

# Meet "Ventures"

**he's ready to be adopted!!!**

.....

**This little guy is in need of a new home. Here's his story:**

**"We (adult, two kids) raised him from chick-size, and when he started crowing, we found a home for him with a bunch of hens but recently, the hens seem to have triggered an aggressive streak in him, so he's back living (in town) with us. He's super mellow with us (people) around, and a good home for him might be where there is another pet (not hens) or people around. We can't keep him in town because he crows..... we are willing/able to help with his transition if it requires pen set-up or food advice, etc. He is 1 1/2 years old."**

....
